Report to the State Electrical Board

The enrollment for the electrical apprenticeship program for fall is nearly completed for the technical schools. In looking at these numbers and comparing them to last years there seems to be a trend for third and fourth year students to remain the same as last year with a decline in the numbers for first and second year. Based upon what is happening in the construction trades across the state this probably is not a surprise, but it does give me some concern based upon the projected shortage of journeyperson electricians in the near future.

The challenge we have is how best to attract qualified people who have an interest and desire to make their living in this profession. We do not have any clear way of getting the message out to those in high school or young adults who are looking for satisfying work.

Even though my current work responsibilities take me out of the PTE office I am still deeply interested in these apprentices. I have asked those who work with potential students about what we might be able to do differently at Eastern Idaho Technical College to proclaim that message with effectiveness. We do not have any secret, but believe a consistent message might be helpful.

Respectfully,

Burton L. Waite  
Interim President  
Eastern Idaho Technical College
